

Since this will be my last report I would like to reflect on the past years I have been on the Kimble Lake Homeowners Association.

Our goal has always been to encourage wise use of our wonderful lake and do whatever possible to prevent anything that threatens to change the lake environmentally or ecologically. Various individuals and groups of individuals have all helped in this effort. This would include the LID Board, the AIS Committee, the Water Quality Committee and all those people volunteering to monitor our access to prevent invasive species from entering the lake. I am continually impressed by their efforts.

We also have a great Social Committee which plans and carries out all the fun things that happen throughout the summer. These are the activities that make Kimble Lake a unique and close community. It takes a lot of responsible people to do this. In fact I can personally count at least 25 separate individuals, some serving on several committees that are involved in these activities. In addition to this, your monetary support, which includes approximately 90% contributing to your association, has also been outstanding.

Although it is sad to see people leave the lake, it is always refreshing to see new people move to Kimble and start to be involved in the community. We continually encourage new residents to get involved in the activities and committees and become part of this living and growing area.

Therefore, thank you for your continued support. It's been a privilege.

Sincerely,

Bob Maas, KLHA President
